

# Tenso P-10

P-System

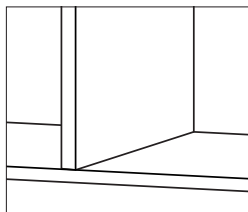

Self-clamping connector  
for gluing thin materials  
(12 mm thickness and greater)

Blocking period:  
For publication  
from 14 January  
2019 only

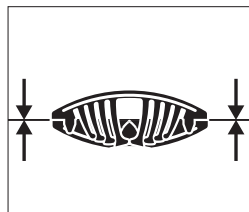

## Gluing

Fast gluing with  
no need for screw  
clamps or presses

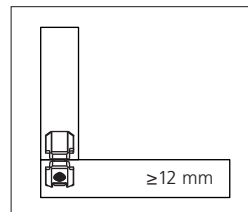

## Invisible

Invisible joining  
element

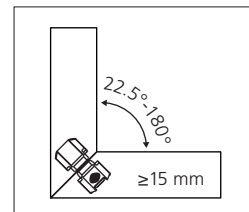

## High clamping force

Self-clamping  
for flexible gluing

## Thin materials

Glue materials of  
12 mm thickness  
and greater

## Increased angle flexibility

Minimal installation  
depth for mitre joints of  
15 mm material thickness  
and greater

## Applications

**Unique gluing aid without clamps or carcass presses**, developed for mitre joints (45°) from 15 mm or butt joints (90°) of 12 mm plate thickness and greater.

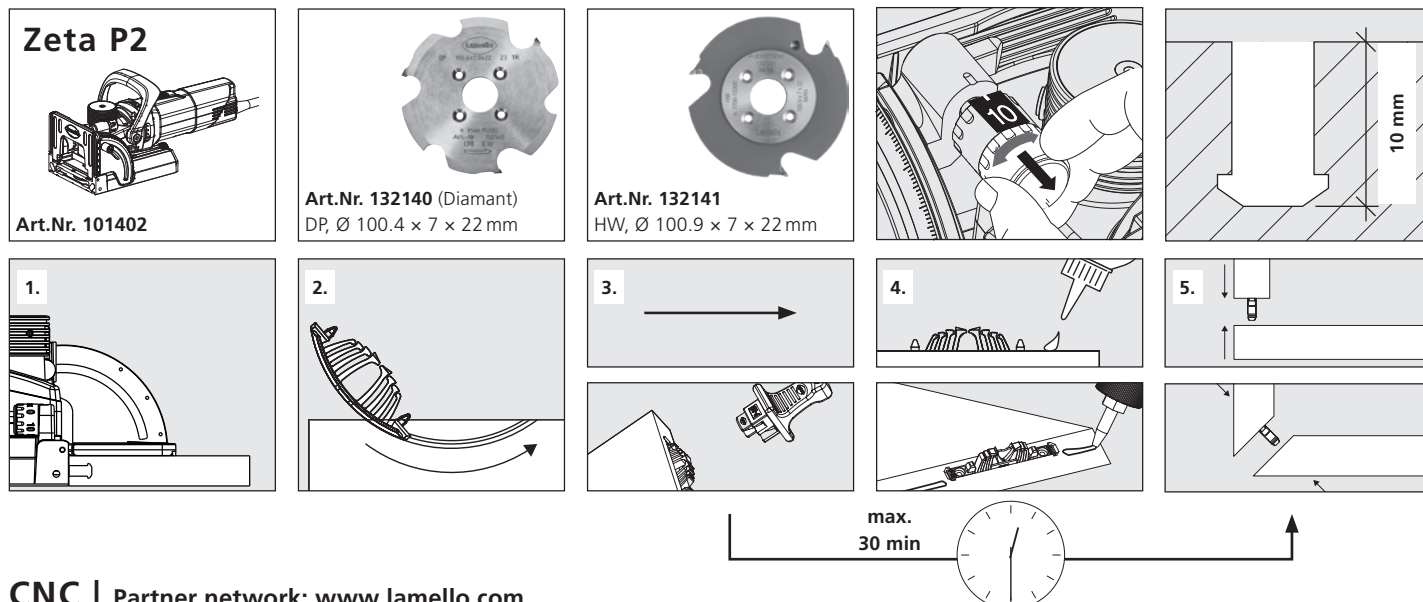

*Ideal for furniture  
that is delivered  
pre-glued:*

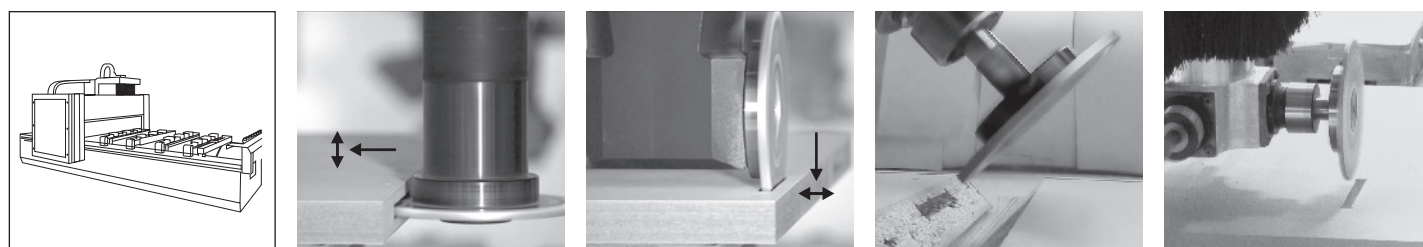

- bathroom furniture
- sideboards
- small shelving units
- doorframes
- panels
- covering panels
- ornamental frames

# How it works:

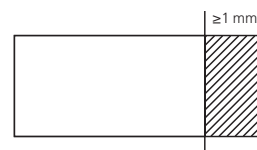

**CNC** | Partner network: [www.lamello.com](http://www.lamello.com)

## Information:

A rim must be used for plate thicknesses of 12 mm or 13 mm. This is not needed for thicker materials like e.g. hardwood, mineral materials, or HPL panels.  
The element may otherwise stick out or there may be a risk of cracking.

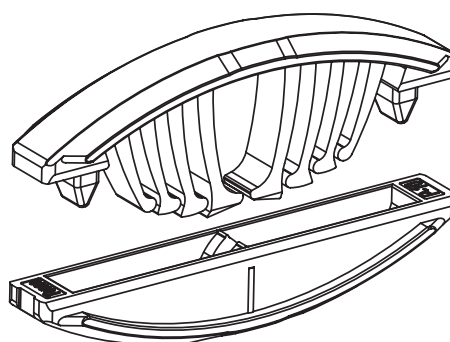

## Technical data

### Technical data

Size.....	52 × 19 × 9.7 mm
Cutter.....	Ø 100.4 × 7 × 22
Material .....	Glass fibre reinforced plastic
Installation tolerance .....	Longitudinal ± 1 mm

### Clamping force (N)

per connector ~ 100

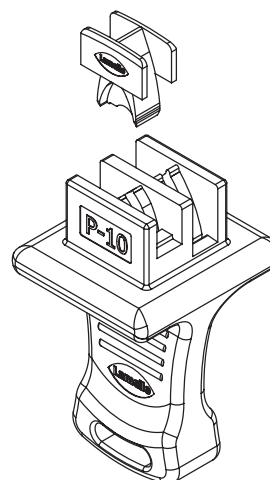

**Part no. 145438**  
Tenso P-10, 1,000 pairs

## Tenso P-10 Items

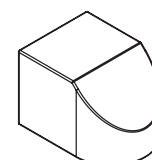

Items	Part no.
Tenso P-10, 80 pairs (with preload clip).....	<b>145418</b>
